THERE IS NO PRICE TAG ON THE VALUE OF LIFE

But, there is one for each unfortunate life-changing incident.

| Hospitalisation | Over a third of Malaysians are directly paying for medical services using their own money.\(^1\) With medical inflation climbing steadily at 12% per annum\(^2\), private medical treatment is fast becoming a luxury that not many of us can afford. Malaysian employees also suffer from insufficient or limited coverage and inflexible terms when it comes to their protection. The medical benefit of employees offered by employer varies greatly as the coverage provided differs among the organisation. Some companies offer better employee benefits whilst there are also companies that provide only the basic needs of an employee. Having a 2nd coverage plan can help to reduce your financial burden over the inflating cost of medical expenses. |
| Critical Illness | 1 in 4 Malaysians are expected to be diagnosed with cancer before the age of 75.\(^3\) |
| Accident | In 2016, a total of 7,152 people died in road accidents in Malaysia.\(^4\) |

For more details on this plan and its optional riders, please refer to the Plan Illustration, Product Disclosure Sheet, Fund Profile, the consumer education booklet on Family Takaful, Investment-Linked Takaful, and Medical and Health Takaful Plan before participating in the plan and to refer to the terms and conditions in the certificate document for details of the importance features of the plan.

2. Please note that the package here consists of components that can be participated in separately and you are not obliged to select all components of this package.

3. You should satisfy yourself that the plan serves your needs and that you can afford the contribution.

4. The returns from your PUA and IUA (if applicable), if any, will be based on the actual performance of the funds and it is not guaranteed.

5. The risk of investment is borne solely by you and the benefits may be less than your total contributions paid.

6. PruBSN AsasLink is based on Wakalah Bil Ajr model, which is an arrangement for PruBSN to manage your takaful plan in return for the charges as stated above. Your contribution will be placed in PUA and IUA (if applicable) after deducting an upfront wakalah charge. The takaful protection comes from the Tabarru’ Fund.

7. You are entitled to receive any distributable surplus from the Tabarru’ Fund inclusive of investment profit (if any). Together with other participants, you are entitled to 50% of the surplus and PruBSN will receive the balance of 50% as incentive for managing the Tabarru’ Fund. 8. Contributor riders will assist in the payment of total contribution upon death (if applicable), TPD or critical illness of yourself or your family members during the contribution payment term of the certificate and the amount of benefit is as set out in the takaful certificate document. In the event of contribution or charges revision affecting total contribution in the future, you are expected to pay additional top-up contribution(s) so as to ensure the PUA and IUA values are sustainable throughout the certificate term.

9. There is a free-look period of 15 days after the delivery of your certificate to allow you to review it if it meets your needs. If the certificate is canceled within this period, we will refund to you the value of units (at the next pricing date) plus the contributions that are not invested, Tabarru’, service charge, processing charge (if any), service tax (if any) that we have deducted, less medical expenses that we may have already paid or agreed to pay.

10. If you cancel the certificate in the early years, you may not be able to obtain the full value from the amount you have paid to us. When you surrender the certificate, all benefits in the certificate will be terminated.

11. If you cease or miss paying contribution, your coverage might lapse prematurely. Your certificate will lapse if the amount in PUA and/or IUA is not enough to pay for the Tabarru’ and other charges.
