Market Review

Global markets trended up in February as investors were upbeat on better news around trade talks and a dovish US Federal Reserve stance despite softer economic data. Crude oil prices saw another strong month as OPEC continued to talk up output cuts. Brent crude oil rose 7% mom to US\$66/bbl, providing support for the ringgit which appreciated 0.8% against the US Dollar. On the local front, the Malaysian Government began negotiations with Gamuda for the acquisition of four highway concessions, without imposing the expropriation clause. The KLCI closed the month at 1,707.73 points, up 1.44% mom, lagging behind the regional and global markets. There was a short rally post the Chinese New Year break, but was short lived as many companies reported results that were quite weak. The FBM Small Cap index gained 3.61% for the month.

Market Outlook

External headwinds seem to be getting stronger, with a lot of uncertainties likely to prevail and fuel volatility. The US-China trade truce has been extended, as negotiations are still on-going and rhetoric so far has been relatively positive that some sort of resolution and compromise will be found – but still an uncertain outcome. The UK government is still trying to work out an agreement ahead of the Brexit deadline 29 March 2019, to avoid participating in the EU elections on 23 May 2019. Domestically, it is challenging to identify positive catalysts that will drive the economy out of this lethargy. Nevertheless, we remain focused on companies that have strong fundamentals and a good track record of thriving even in challenging environments.

Fund Review & Strategy

The Fund returned 2.43% for the month, underperforming the benchmark return of 3.15% by 0.72%. Year-to-date, the fund returned 5.98%, underperforming the benchmark return of 9.26% by 3.28%. The underperformance was due to our underweight in oil & gas stocks.

The recent results season was disappointing, and we expect the weakness will continue to linger in the shorter term. We are taking some profit off the table and will be selective in our purchase. We are reducing some technology names in case the Ringgit strengthens from here.

Ekuiti

Tinjauan Bulanan

Pasaran global meningkat pada bulan Februari memandangkan para pelabur terangsang dengan berita baik mengenai perbincangan perdagangan dan pendirian lembut Rizab Persekutuan AS walaupun data ekonomi dilaporkan lebih rendah. Harga minyak mentah sekali lagi mencatat prestasi yang ampuh apabila OPEC terus menyuarakan pengurangan output.

Minyak mentah Brent yang naik 7% bulan ke bulan kepada ASD66 setong, telah menyokong Ringgit lalu menokok 0.8% berbanding Dolar AS. Meninjau perkembangan tempatan, Kerajaan Malaysia memulakan rundingan dengan Gamuda berkenaan pemerolehan empat konsesi lebuh raya, tanpa melibatkan klausa ekspropriasi. Indeks FBM Emas Syariah ditutup pada 1,707.73 mata, naik 1.44% bulan ke bulan, namun terkebelakang di pasaran serantau dan global. Terdapat rali yang singkat selepas cuti Tahun Baru Cina, tidak bertahan lama ekoran kebanyakan syarikat melaporkan prestasi yang agak hambar. Indeks FBM Small Cap Syariah naik 3.54% dalam bulan tersebut.

Gambaran Bulanan

Rempuhan luaran kelihatan semakin kuat, dengan banyak ketakpastian yang mungkin berlaku dan ketaktentuan harga bahan api. Gencatan perdagangan AS-China diperpanjang, ekoran rundingan masih lagi berterusan dan retorik sejauh ini agak positif, dengan kemungkinan sebilangan resolusi dan kompromi akan dirumuskan - tetapi masih lagi belum pasti. Kerajaan UK masih berusaha untuk membuahkkan persetujuan menjelang tarikh akhir Brexit pada 29 Mac 2019, bagi mengelak daripada mengambil bahagian dalam pilihan raya EU pada 23 Mei 2019. Situasi domestik masih mencabar dalam mengenalpasti pemangkin positif yang akan mendorong ekonomi keluar dari lingkaran kesuraman tersebut. Walau bagaimanapun, kami tetap memberi tumpuan kepada syarikat yang mempunyai asas yang kukuh dan rekod prestasi yang baik untuk berkembang maju walaupun dalam persekitaran yang mencabar.

Tinjauan dan Strategi Dana

Dana mengembalikan 2.43% untuk bulan ini, tidak mengatasi pulangan penanda aras 3.15% sebanyak 0.72%. Setakat tahun ini, Dana mengembalikan 5.98%, tidak mengatasi pulangan penanda aras 9.26% sebanyak 3.28%. Prestasi hambar ini ekoran kekurangan pegangan dalam saham minyak & gas.

Musim pelaporan prestasi baru-baru ini adalah mengecewakan dan kami menjangkakan bahawa kelembapan akan berlarutan dalam tempoh yang lebih singkat. Kami mengambil sedikit keuntungan dan akan kekal selektif dalam pembelian. Kami mengurangkan pegangan dalam sebahagian saham teknologi sekiranya Ringgit mengukuh selepas ini.
