Monthly Update / Laporan Bulanan Terkini

Equities

Market Review

Global equity markets corrected sharply for the month of March as global recessionary pressures strengthened with the alarming rise in infections from COVID-19 outside of China, especially in the US and Europe. Industrial shutdowns wreaked havoc on supply chains whilst social distancing continues to depress consumption. Oil prices recorded a historical decline as OPEC and Russia failed to come to an agreement on extended production cuts.

Malaysia was not spared from the COVID-19 outbreak, resulting in the need for the government to implement a Movement Control Order (MCO) on the population of Malaysia effective 18 March 2020 until 31 March 2020, before an extended MCO date till 14 April, in an effort to slow the spread of COVID-19. The Malaysian government announced a stimulus package worth RM250bn to help cushion the economic fallout from this pandemic.

The FBM Shariah Emas index declined 9.14% mom in March 2020 to close at 10,105 points. The FBM Shariah Small Cap index declined 27.4% for the month underperforming the FBM Shariah Emas index.

Market Outlook

The start of 2020 is already marred with geo-political tensions, natural disasters, and a viral outbreak. Depending on how long this COVID-19 outbreak continues, we would expect global growth to be affected by the muted consumption and manufacturing activities.

The black swan event of the change of government in Malaysia will add to the drag on the economy, already weighed down by the COVID-19 outbreak, and weaker outlook for the commodity-related sectors. BNM released their 2019 Annual Report and with it their revised down GDP growth forecast for 2020 of -2.0% to +0.5%, highlighting the impact of COVID-19 causing global demand destruction, the subsequent supply shocks, and then demand shock to the economy. This could lead to excess capacity and unemployment issues.

With the risk of a global recession for 2020, we remain cautious as we believe the impact on the economy will be felt over the next few quarters. In this instance a V-shape recovery doesn't seem likely and it is a matter of how deep a U-shape recovery it will be. Nevertheless, we would look to accumulate fundamentally sound stocks on weakness.

Fund Review & Strategy

The Fund returned -18.86% for the month, outperforming the benchmark return of -21.13% by 2.27%. Year-to-date, the fund returned -23.03%, outperforming the benchmark return of -27.91% by 4.88%. The outperformance in March was due to the underlying fund's underweight position in the oil & gas sector.

The coronavirus outbreak, change in government leadership and weakening global economy posed downside risk to the domestic stock market. Over the longer term, we still like the banks, healthcare and technology stocks.

Ekuiti

Tinjauan Bulanan

Pasaran ekuiti global diperbetulkan dengan ketara bagi bulan Mac setelah tekanan kemelesetan global meningkat seiring dengan peningkatan jangkitan COVID-19 di luar China yang membimbangkan, terutamanya di AS dan Eropah. Pemberhentian aktiviti perindustrian mencetus malapetaka pada rantaian bekalan, manakala penjarakan sosial terus menyuramkan penggunaan. Harga minyak mencatatkan kemerosotan yang bersejarah kerana OPEC dan Rusia gagal mencapai persetujuan mengenai tambahan pengurangan pengeluaran.

Malaysia tidak terkecuali daripada wabak COVID-19, yang menyebabkan kerajaan melaksanakan Perintah Kawalan Pergerakan (MCO) ke atas penduduk Malaysia, berkuat kuasa mulai 18 Mac 2020 sehingga 31 Mac 2020, yang telah dilanjutkan sehingga 14 April, suatu pendekatan untuk membendung penularan COVID-19. Kerajaan Malaysia mengumumkan pakej rangsangan bernilai RM250 bilion bagi membantu menampai kejatuhan ekonomi berikutan wabak tersebut.

Indeks FBM Shariah Emas susut 9.14% bulan ke bulan pada Mac 2020 lalu ditutup pada 10,105 mata. Indeks FBM Shariah Small Cap jatuh 27.4% pada bula tersebut, tidak mengatasi pencapaian indeks FBM Shariah Emas.

Gambaran Bulanan

Permulaan tahun 2020 sedia terpalit lumpur ketegangan geo-politik, bencana alam, dan wabak virus. Bergantung kepada berapa lama wabak COVID-19 ini akan berterusan, kami menjangkakan bahawa pertumbuhan global akan dipengaruhi oleh aktiviti penggunaan dan pembuatan yang berjerda.

Persitiwa di luar dugaan iaitu perubahan kerajaan di Malaysia akan menambahkan lagi seretan ekonomi, yang sedia dihimpit oleh wabak COVID-19, serta prospek lemah bagi sektor yang berkaitan komoditi. BNM mengeluarkan Laporan Tahunan 2019 dengan ramalan pertumbuhan KDNK bagi 2020 disemak turun -2.0% kepada +0.5%, menonjolkan kesan COVID-19 yang mengakibatkan keruntuhan permintaan global, seterusnya herotan bekalan, diikuti herotan permintaan kepada ekonomi. Ini boleh menyebabkan potensi kapasiti yang berlebihan dan isu pengangguran.

Dengan risiko kemelesetan global yang meruap pada tahun 2020, kami terus berwaspada kerana kami percaya bahawa kesan ekonomi akan dirasai dalam beberapa suku tahun yang akan datang. Dalam keadaan ini, pemulihan berbentuk V pada kadar segera mungkin tidak akan kelihatan, serta ia berkenaan kedalaman pemulihan berbentuk U. Namun begitu, kami akan menimbang untuk mengumpulkan saham yang mantap pada harga yang rendah.

Tinjauan dan Strategi Dana

Dana mencatat pulangan -18.86% untuk bulan ini, mengatasi pulangan penanda aras -21.13% sebanyak 2.27%. Sejak awal tahun hingga kini, Dana memulangkan -23.03%, mengatasi pulangan penanda aras -27.91% sebanyak 4.88%.

Prestasi baik pada bulan Mac disebabkan oleh kedudukan dana pendasar yang kekurangan pegangan dalam sektor minyak & gas.

Meletusnya wabak koronavirus, perubahan dalam kepemimpinan kerajaan dan ekonomi global yang memperlahkan telah menimbulkan risiko ke bawah kepada pasaran saham domestik. Untuk jangka masa lebih panjang, kami masih menyukai saham perbankan, penjagaan kesihatan dan teknologi.
