## Monthly Update / Laporan Bulanan Terkini

### Equities

#### Market Review

In June 2025, global markets continued its momentum from lows in early April. Progress in US-China trade talks in London, conflict de-escalation in the Middle East, and expectation of a dovish Fed drove equity markets and US treasury yields lower. The USD continued to weaken on expectations of rate cuts and slowing US economic growth. Locally, the FBM EMAS Shariah Index closed the month higher by 1.62%, while the FBM MidS Cap Shariah Index rose 0.30% for the month, underperforming the broader market FBM EMAS Shariah Index.

#### Market Outlook

Malaysian equities recovered in June with the FBM KLCI gaining 1.6%, although the overall market tone remained cautious. On the policy front, the government announced the expansion of the Sales and Services Tax ("SST"), effective 1 July 2025. The revised tax framework targets premium goods and services, especially those consumed by high-income individuals, large corporations, and non-citizens, while essential items will remain zero-rated. The expansion is expected to raise RM10bil in additional fiscal revenue annually. Some equity indices have fully recovered past levels pre-Liberation Day. The Target Fund Manager believes that the market may have priced in most of the positives and not the negative impact from impending US tariffs. Hence, they continue to adopt a more cautious approach in navigating current market volatility.

#### Fund Review & Strategy

The Target Fund Manager expects near term headwinds to the domestic market due to corporate earnings downgrades and worse than expected outcome for US tariffs on Malaysia. Given the above average beta nature of smaller cap stocks, they would keep a stock picking approach to gain excess returns. As such, they would maintain slightly higher cash level for the Target Fund, while they look to deploy once opportunities arise.

### Ekuiti

#### Tinjauan Bulanan

Pada Jun 2025, pasaran global meneruskan peningkatan momentumnya daripada paras terendah di awal April. Kemajuan dalam rundingan perdagangan AS-China di London, pengenduran konflik di Timur Tengah, dan Fed yang dijangka akan lebih lembut, mendorong pasaran ekuiti dan hasil perbandaraan AS ke paras yang lebih rendah. USD terus lemah berikutan jangkaan penurunan kadar dan pertumbuhan ekonomi AS yang perlakan. Dalam negara, Indeks FBM Emas Shariah menutup bulan lebih tinggi sebanyak 1.62%, manakala Indeks Syariah MidS Cap FBM meningkat 0.30% pada bulan ini, mengatasi prestasi pasaran Indeks FBM Emas Shariah yang lebih luas.

#### Gambaran Bulanan

Ekuiti Malaysia pulih pada Jun dengan FBM KLCI memperoleh 1.6%, walaupun nada pasaran keseluruhan masih berhati-hati. Dari segi dasar, kerajaan mengumumkan peluasan Cukai Jualan dan Perkhidmatan ("SST"), berkuat kuasa 1 Julai 2025. Rangka kerja cukai yang dirombak menyasarkan barang dan perkhidmatan premium, terutamanya yang digunakan oleh individu berpendapatan tinggi, syarikat besar dan bukan warganegara, manakala barang keperluan akan kekal berkadar sifar. Peluasan ini dijangka akan meningkatkan pertambahan hasil fiskal RM10 bilion setiap tahun. Beberapa indeks ekuiti telah pulih sepenuhnya dari tahap pra Hari Pembebasan. Pengurus Dana Sasaran percaya bahawa pasaran mungkin telah menetapkan harga kebanyakan faktor positif dan bukannya kesan negatif daripada tarif AS yang akan dilaksanakan. Oleh itu, pengurus terus menggunakan pendekatan yang lebih berhati-hati dalam mengemudi volatiliti pasaran semasa.

#### Tinjauan & Strategi Dana

Pengurus Dana Sasaran menjangkakan halangan jangka pendek kepada pasaran domestik disebabkan oleh penurunan taraf pendapatan korporat dan rumusan tarif AS ke atas Malaysia yang lebih buruk daripada jangkaan. Memandangkan sifat beta stok bermodal lebih kecil mengatasi purata, pengurus akan mengekalkan pendekatan pemilihan stok untuk meraih pulangan secara berlebihan. Oleh itu, pengurus akan mengekalkan tahap kecairan yang lebih tinggi sedikit buat Dana Sasaran, dan menggunakan sebaik sahaja peluang semakin muncul.
