## Monthly Update / Laporan Bulanan Terkini

### Equities

#### Market Review

In May 2025, the US equity market demonstrated strong performance, with major indices such as the Dow Jones, S&P 500 and Nasdaq rising by 3.94%, 6.15%, and 9.56%, respectively. This rally was driven by the 90-day pause in US-China trade tensions, which temporarily reduced heightened uncertainty in US-China trade. Tech stocks rallied after Trump revoked the Biden-era AI Diffusion Rule which curbed global exports of AI chips. Locally, the FBM EMAS Shariah Index closed the month lower by 0.16%. FBM MidS Cap Shariah Index rose 1.15% for the month, outperforming the FBM EMAS Shariah Index. The market initially adopted a risk on sentiment following the announcement of a 90-day pause in US-China trade tensions. However, this momentum was short-lived, as 1Q2025 corporate earnings was generally disappointing and a lack of earnings visibility amid tariff uncertainties dampened sentiment.

#### Market Outlook

Malaysia equities declined in May 2025, underperforming most regional markets which saw some tariff relief rally in the month. Foreign funds turned net buyers in May 2025 after net selling Malaysia equities for 7 consecutive months. Malaysia 1Q 2025 GDP came in at 4.4% YoY, slightly missing market expectations. The Target Fund Manager anticipate downward revisions to official growth forecasts as uncertainty from tariffs saps trade growth and economic activity. There were more misses than beats in Malaysia corporate earnings in 1Q 2025, which led to more forecast downgrades. They expect near term headwinds to markets arising from global trade uncertainties. As such, they would adopt a more cautious approach to navigate current market volatility.

#### Fund Review & Strategy

The Fund returned 0.75% for the month, outperforming the benchmark return of 0.69% by 0.06%. Year-to-date, The Fund returned -10.67%, outperforming the benchmark return of -14.69% by 4.02%. The Target Fund's cash position contributed positively to the performance. With market volatility anticipated, the Target Fund Manager would maintain some cash for the Target Fund. They would also take into account the liquidity risk and above average beta nature of small cap stocks.

### Ekuiti

#### Tinjauan Bulanan

Pada Mei 2025, pasaran ekuiti AS menunjukkan prestasi yang kukuh, dengan indeks utama seperti Dow Jones, S&P 500 dan Nasdaq masing-masing meningkat sebanyak 3.94%, 6.15% dan 9.56%. Peningkatan ini didorong oleh penangguhan ketegangan perdagangan AS-China selama 90 hari, yang mengurangkan ketidaktentuan perdagangan AS-China dari memuncak buat sementara waktu. Stok teknologi menonjok selepas Trump membatalkan Peraturan Penyebaran AI era Biden yang mengekang eksport global cip AI. Di dalam negara, Indeks Syariah EMAS FBM menutup bulan dagangan lebih rendah, sebanyak 0.16%. Indeks Syariah MidS Cap FBM meningkat 1.15% pada bulan ini, mengatasi prestasi Indeks Syariah EMAS FBM. Pasaran pada mulanya menerima pakai risiko ke atas sentimen berikut pengumuman penangguhan ketegangan perdagangan AS-China selama 90-hari. Namun begitu, momentum ini berlaku sebentar sahaja kerana pendapatan korporat 1Q2025 secara amnya menggejarkan dan keterlihatan pendapatan yang samar-samar di tengah-tengah ketidaktentuan tarif menjelaskan sentimen.

#### Gambaran Bulanan

Ekuiti Malaysia merosot pada Mei 2025, tidak mengatasi pencapaian kebanyakan pasaran serantau yang menonjok lantaran penangguhan tarif pada bulan ini. Dana asing bertukar menjadi pembeli bersih pada Mei 2025 selepas ekuiti Malaysia mencatat jualan bersih selama 7 bulan berturut-turut. KDNK Malaysia 1Q 2025 mencapai 4.4% YoY, meleset sedikit dari jangkaan pasaran. Pengurus Dana Sasaran menjangkakan unjuran pertumbuhan rasmi akan disemak turun oleh kerana ketidakpastian tarif yang menjelaskan pertumbuhan perdagangan dan aktiviti ekonomi. Pendapatan korporat Malaysia pada Q1 2025 lebih banyak silap langkah berbanding langkah kanan lalu membuatkan lebih banyak ramalan penurunan taraf. Pengurus Dana Sasaran menjangkakan tantangan jangka pendek kepada pasaran yang timbul daripada ketidaktentuan perdagangan global. Oleh itu, Pengurus Dana Sasaran akan menggunakan pendekatan yang lebih berhati-hati dalam mengemudi volatiliti pasaran semasa.

#### Tinjauan & Strategi Dana

Dana menyampaikan pulangan 0.75% pada bulan ini, mengatasi pulangan penanda aras 0.69% dengan perbezaan 0.06%. Sejak awal tahun sehingga kini, Dana mengembalikan -10.67%, mengatasi pulangan penanda aras -14.69% dengan perbezaan 4.02%. Kedudukan tunai Dana Sasaran menyumbang secara positif kepada prestasi. Dengan jangkaan volatiliti melanda pasaran, Pengurus Dana Sasaran akan mengekalkan sejumlah wang tunai dalam Dana Sasaran. Pengurus Dana Sasaran juga akan mengambil kira risiko kecairan dan sifat beta melebihi purata bagi saham bermodal kecil.
