Monthly Update / Laporan Bulanan Terkini

Market Review

The Malaysian equity markets resumed its positive performance in April, outperforming Emerging Markets and Asia Ex-Japan, amidst the turbulence in the Middle East, recently exacerbated by the Iran-Israel conflict, and the US Fed renewed rhetoric of "higher for longer". On the 13 April 2024, Iran launched dozens of drones towards Israel, escalating tensions and setting the stage for a direct military confrontation between the two nations. Thankfully, on the intervention of their allies, this de-escalated quickly post the incident. Domestically, the news for the month was the launch of the Energy Exchange (ENEGEM) by the Ministry of Energy Transition and Water Transformation, inviting interested parties to participate in the inaugural auction for purchasing green electricity from Malaysia's supply system to be supplied to Singapore. The auction will begin with a 100MW pilot run, utilizing the existing interconnection between Singapore and Peninsular Malaysia. On 25 April, EPF announced the restructuring of contributors' accounts, to introduce a new Account 3, which will allow for the flexibility of withdrawals for those members below age 55 years old starting 11 May. The FBM Emas Shariah Index closed the month at 12,085.94, up 3.8% mom. The FBM Small Cap Shariah index gained 3.49% for the month and underperformed the FBM Emas Shariah Index.

Market Outlook

Global political tensions continue to be in the limelight. The conflict in the Middle East still needs to be monitored closely as tensions could escalate easily, especially with Israel's decision to enter Hamas' stronghold in Rafah. This was despite both parties were in talks for a temporary ceasefire. In addition, we have the ongoing Russia-Ukraine conflict that has yet to see a resolution after more than 2 years. To add to the mix will be the closely watched US Presidential Elections in November 2024, and what the result could imply for US-China relations. Domestically, equity markets have performed well thus far, with investor sentiment improving running on themes relating to Johor, and NETR. Recent buying support to the equity market could be the result of funds flowing back to Malaysia with the intention to invest domestically, post the government and BNM's encouragement of GLICs and GLCs to repatriate dividends to Malaysia. The recent EPF account 3 announcement may start seeing member withdrawals as soon as 12 May 2024 onwards which could boost consumer spending. However, this could be mitigated by the expected petrol/diesel subsidy rationalization expected to be rolled out in 2H2024. The shape and form of this measure have yet to be announced. Overall, we are cautious about the potential inflationary impact of the subsidy removals, and higher commodity prices resulting in companies raising prices. The Malaysian's commitment to the boycott of goods and services from companies deemed to be in support of Israel has been strong, leading to F&B outlet closures, which may have a longer-term negative impact for investment in Malaysia and on employment opportunities for Malaysians. Nevertheless, equity markets may still be buoyant driven by the ample liquidity. Any correction in the market will provide us the opportunity to accumulate fundamentally sound stocks.

Fund Review & Strategy

The Fund returned 1.99% for the month, marginally underperforming the benchmark return of 2.00% by 0.01%. Year-to-date, the fund returned 8.06%, outperforming the benchmark return of 5.41% by 2.65%. The underperformance in April was mainly attributed to the underlying Fund's underweight positions in selected industrial stocks. For equity, we remain constructive on sectors that stand to benefit from thematic plays (NETR, NIMP, JS-SEZ). We continue to focus on companies where fundamentals remain solid and look for opportunities to buy on weakness for longer term growth. For fixed income, the Fund would look to participate in selected quality issuances for yield pick-up, and trade on market volatility, subject to liquidity constraints.

Tinjauan Bulanan

Pasaran ekuiti Malaysia meneruskan pencapaian yang positif pada April, mengatasi prestasi Pasaran Memuncul dan Asia Luar Jepun, di tengah-tengah pergolakan di Timur Tengah dan usaha Fed US memperbaharui retorik "lebih tinggi untuk lebih lama". Pada 13 April 2024, Iran melancarkan berdozen-dozen dron ke arah Israel, lalu menyemarakkan ketegangan seterusnya menjerumuskan mereka ke dalam kancah konfrontasi ketenteraan antara kedua-dua negara. Hasil campur tangan sekutu masing-masing, keadaan mulai reda sejurus insiden tersebut. Di dalam negara, pelancaran Pertukaran Tenaga ("ENEGEM") oleh Kementerian Peralihan Tenaga dan Transformasi Air menjadi tajuk berita utama, lalu pihak yang berminat menyertai lelongan sulung membeli tenaga elektrik hijau daripada sistem bekalan Malaysia untuk disalurkan ke Singapura. Lelongan itu akan dimulakan dengan pelancaran perintis 100MW, yang menggunakan laluan sedia ada antara Singapura dan Semenanjung Malaysia. Pada 25 April, KWSP mengumumkan penstrukturan semula akaun pencarum, lalu memperkenalkan Akaun 3 yang baharu, yang memberikan fleksibiliti buat ahli di bawah umur 55 tahun membuat pengeluaran bermula 11 Mei. Indeks FBM Emas Shariah melabuhkan tirai bulan pada 12,085.94, naik 3.8% MoM. Indeks FBM Small Cap Shariah memperoleh 3.49% pada bulan tinjauan, mengatasi prestasi Indeks FBM Emas Shariah.

Gambaran Bulanan

Ketegangan politik global terus menjadi tumpuan. Konflik di Timur Tengah masih perlu dipantau dengan teliti kerana ketegangan boleh memuncak dengan mudah, terutamanya berikutan keputusan Israel untuk menerobos kubu kuat Hamas di Rafah. Ini berlaku walaupun kedua-dua pihak sedang dalam runding gencatan senjata sementara. Di samping itu, kita juga dibebani oleh konflik Rusia-Ukraine yang masih belum menemui jalan penyelesaian melangkaui 2 tahun. Turut terheret ke dalam kancah ini ialah Pilihan Raya Presiden US yang menjadi perhatian khusus pada November 2024, dan pengaruh keputusannya ke atas hubungan US-China. Di dalam negeri, pasaran ekuiti menunjukkan prestasi yang memberangsangkan setakat ini, dengan sentimen pelabur yang semakin baik berdasarkan tema berkaitan Johor dan NETR. Sokongan belian ke atas pasaran ekuiti baru-baru ini mungkin hasil daripada dana yang mengalir kembali ke Malaysia dengan tujuan untuk melabur dalam negara, berikutan galakan kerajaan dan BNM ke atas GLIC dan GLC untuk mengembalikan dividen ke Malaysia. Pengumuman akaun 3 KWSP baru-baru ini mungkin menyeru ahli mengeluarkan caruman seawal 12 Mei 2024 dan seterusnya boleh menggalakkan perbelanjaan pengguna. Walau bagaimanapun, galakan ini boleh mengendur ekor rasionalisasi subsidi petrol/diesel yang dijangka akan dilaksanakan pada 2H2024. Rupa dan bentuk langkah ini masih belum diumumkan. Secara keseluruhan, kami berwaspada tentang potensi kesan inflasi akibat pemansuhan subsidi, di samping harga komoditi yang lebih tinggi akan mendorong peniaga menaikkan harga. Komitmen rakyat Malaysia terhadap pemboikotan barangan dan perkhidmatan ke atas syarikat yang dianggap menyokong Israel tidak berbelah bahagi, lalu mengakibatkan penutupan kedai F&B, yang mungkin mempunyai kesan negatif jangka panjang ke atas pelaburan di Malaysia dan peluang pekerjaan buat rakyat Malaysia. Namun begitu, pasaran ekuiti mungkin masih rancak didorong oleh kecairan yang lebih dari mencukupi. Apa-apa pembetulan dalam pasaran akan memberi peluang untuk mengumpul saham yang mempunyai asas kukuh.

Tinjauan & Strategi Dana

Dana memberikan pulangan 1.99% pada bulan ini, sedikit tidak mengatasi prestasi pulangan penanda aras 2.00% dengan perbezaan 0.01%. Sejak awal tahun sehingga bulan tinjauan, Dana mengembalikan 8.06%, mengatasi pulangan penanda aras 5.41% dengan perbezaan 2.65%. Prestasi rendah pada April disebabkan terutamanya oleh kedudukan kekurangan pegangan Dana dalam saham perindustrian tertentu. Meninjau ekuiti, kami kekal berpandangan konstruktif ke atas sektor yang mendapat manfaat daripada permainan bertema (NETR, NIMP, JS-SEZ). Kami terus memberi tumpuan kepada syarikat yang asasnya kekal kukuh dan mencari peluang untuk membeli saham pada harga rendah bagi pertumbuhan jangka panjang. Meninjau pendapatan tetap, Dana akan menimbang untuk mengambil bahagian dalam terbitan berkualiti terpilih bagi perolehan hasil, dan berdagang meskipun pasaran tidak menentu, tertakluk kepada kekangan mudah tunai.
