Monthly Update / Laporan Bulanan Terkini

Market Review

The performance of big cap stocks in Malaysia was weak in July due to the uncertainties surrounding the US tariffs, post the 90-day pause which expired on 9 July 2025, and the new tariff which was announced for 14 countries that were not able to secure an agreement by then. The tariff on Malaysian products to the US as of 9 July 2025 was 25% (vs 2 April 2025 at 24%). BNM at their July MPC announced a 25bps cut to OPR to 2.75% and later announced their revised GDP growth forecasts for 2025 of 4%-4.8% (vs 4.5%-5.5%), taking into account various tariff scenarios. BNM also lowered its inflation outlook to 1.5%–2.3%, citing softer cost and demand pressures. FBM Emas Shariah Index closed the month at 11,461.67, up 0.2% mom. The FBM Small Cap Shariah index was up 2.97% for the month and outperformed the FBM Emas Shariah Index.

Market Outlook

On 1 Aug 2025, the US White House released adjusted reciprocal tariff rates covering imports from a range of trading partners, aimed at narrowing trade deficits. The revised duties are scheduled to take effect at 12:01 am on 7 Aug 2025 and range from 10% to 41%. Malaysia managed to secure a US tariff of 19% which is lower than the 25% announced after the 90-day pause in July 2025, and a rate which is on par with our ASEAN neighbours Indonesia, Thailand and Philippines. This was in line with market expectations that were looking at between 15-20% US tariff and provides some measure of relief to Malaysian exporters. The announcement is a relief to sectors such as the gloves and Electronics and Electrical components (E&E). For the glove players it allows Malaysia to compete on par with Thailand and Indonesia and has a miniscule advantage over Vietnam, where Chinese glove players had set up facilities. E&E should still be under the tariff exemption, but there is still a risk on sector specific tariffs which are expected to be announced later this year. The details of the trade agreement between the US and Malaysia are yet to be unveiled. Nevertheless, Target Fund Manager expect investors' sentiment to improve on the back of this news. Malaysia's economy continues to be supported by the FDI being realized, domestic direct investments, strong construction activities, solid consumption growth and robust tourism activities. The domestic equity market remains flush with liquidity and dividend yield is attractive. Target Fund Manager see any market weakness as opportunities to accumulate fundamentally strong stocks at attractive valuations.

Fund Review & Strategy

The Fund returned -0.10% for the month, underperforming the benchmark return of 0.21% by 0.31%. Year-to-date, the fund contracted -6.83%, underperforming the benchmark return of -3.75% by 3.08%. The underperformance in July was mainly attributed to the underlying Fund's overweight positions in the consumer staples and utilities sectors. For equity, we remain focused on domestic-driven sectors that are more insulated from the tariff risks as well as dividend yielders to anchor the portfolio. We continue to focus on companies where fundamentals remain solid and look for opportunities to buy on weakness for longer term growth. For fixed income, the Fund would look to participate in selected quality issuances for yield pick-up, and trade on market volatility, subject to liquidity constraints.

Tinjauan Bulanan

Prestasi stok bermodal besar di Malaysia lemah pada bulan Julai disebabkan oleh ketidaktentuan mengenai tarif AS, selepas penangguhan 90 hari yang tamat pada 9 Julai 2025, di samping tarif baharu yang diumumkan ke atas 14 buah negara yang tidak dapat mencapai perjanjian pada tarikh akhir. Tarif eksport produk Malaysia ke AS pada 9 Julai 2025 ialah 25% (berbanding 24% pada 2 April 2025). BNM mengumumkan pemotongan OPR sebanyak 25 mata asas kepada 2.75% semasa mesyuarat MPC Julai dan selepas itu mengumumkan unjuran pertumbuhan KDNK 2025 disemak sebanyak 4%-4.8% (berbanding 4.5%-5.5%), dengan mengambil kira pelbagai senario tarif. BNM juga menurunkan prospek inflasinya kepada 1.5%–2.3% lantaran tekanan kos dan permintaan yang lebih lemah. Indeks FBM Emas Shariah menutup bulan pada 11,461.67, naik 0.2% bulan ke bulan (MoM). Indeks FBM Small Cap Shariah naik 2.97% pada bulan tersebut dan mengatasi prestasi Indeks FBM Emas Shariah.

Gambaran Bulanan

Pada 1 Ogos 2025, Rumah Putih AS mengumumkan kadar tarif timbal balik terselaras meliputi import daripada pelbagai rakan dagang, bertujuan untuk mengurangkan defisit perdagangan. Duti yang disemak itu dijadual akan berkuat kuasa pada 12:01 pagi 7 Ogos 2025 dan berkisar antara 10% hingga 41%. Malaysia berjaya memuktamadkan tarif AS sebanyak 19%, lebih rendah daripada 25% yang diumumkan selepas penangguhan 90 hari pada Julai 2025, dan ianya kadar yang setanding dengan negara jiran ASEAN kita, Indonesia, Thailand dan Filipina. Ia sejajar dengan jangkaan pasaran antara 15-20% tarif AS lalu membukakan sedikit kelegaan kepada pengeksport Malaysia. Pengumuman ini melegakan sektor seperti sarung tangan dan komponen Elektronik dan Elektrik (E&E). Bagi penggiat sarung tangan, ia membolehkan Malaysia bersaing setanding dengan Thailand dan Indonesia di samping mempunyai sedikit kelebihan berbanding Vietnam, yang mana penggiat sarung tangan China telah menyiapkan kemudahan. E&E sepatutnya masih lagi di bawah pengecualian tarif, tetapi masih terdapat risiko ke atas tarif sektor khusus yang dijangka akan diumumkan lewat tahun ini. Butiran perjanjian perdagangan antara AS dan Malaysia masih belum didedahkan. Namun begitu, Pengurus Dana Sasaran menjangkakan bahawa sentimen pelabur akan bertambah baik berikutan perkembangan ini. Ekonomi Malaysia terus disokong oleh aliran FDI, pelaburan langsung domestik, aktiviti pembinaan yang kukuh, pertumbuhan penggunaan yang mantap dan aktiviti pelancongan yang rancak. Kecairan dalam pasaran ekuiti domestik masih mengucur manakala hasil dividen menarik. Pengurus Dana Sasaran berpendapat bahawa apa-apa kelemahan pasaran sebagai peluang untuk mengumpul stok berasas kukuh pada penilaian yang menarik.

Tinjauan dan Strategi Dana

Dana menyampaikan pulangan -0.10% pada bulan ini, tidak mengatasi pulangan penanda aras 0.21% dengan perbezaan -0.31%. Sejak awal tahun sehingga kini, Dana menguncup sebanyak -6.83%, tidak mengatasi pulangan penanda aras -3.75% dengan perbezaan -3.08%. Prestasi lesu pada bulan Julai disebabkan terutamanya oleh kedudukan pegangan berlebihan Dana dalam sektor pengguna asasi dan utiliti. Merujuk ekuiti, kami kekal fokus pada sektor berpacuan domestik yang lebih terlindung daripada risiko tarif di samping menghasilkan dividen yang berupaya untuk mengukuhkan portfolio. Kami terus memberi tumpuan kepada syarikat yang asasannya masih utuh sambil mencari peluang untuk membeli saham pada harga yang rendah bagi pertumbuhan jangka panjang. Menyorot pendapatan tetap, Dana akan menghalusi untuk mengambil bahagian dalam terbitan berkualiti terpilih bagi menambahkan hasil sambil berdagang meskipun pasaran tidak menentu, tertakluk kepada keadaan mudah tunai.
