Monthly Update / Laporan Bulanan Terkini

Market Review

The month of May saw Malaysian equities underperforming regional markets, despite seeing some de-escalation in the US tariff trade war. Malaysia's corporate results reporting season in May came in rather underwhelming with more companies disappointing or inline, and only a little surprising on the upside. Those that disappointed were in the telco, oil and gas, auto, gaming, healthcare and utilities sectors. Post the results reporting season, consensus has downgraded earnings from above 6% to below 3% for 2025, with further downside risk to earnings as more analysts start to cut their earnings for the banks. During the month, BNM maintained OPR at 3% but cut the Statutory Reserve Requirement ("SRR") from 2% to 1% releasing RM19bil of liquidity into the banking system. BNM was clear to state that changes to the SRR is an instrument to manage liquidity and is not a signal on the stance of monetary policy. The FBM EMAS Shariah Index closed the month at 11,256.26, down 0.16% MoM. The FBM Shariah Small Cap Index rose 1.21% for the month and outperformed the FBM EMAS Shariah Index.

Market Outlook

Trade talks between the US and many countries are ongoing, but the one global market closely monitors is between China and US, which in recent days has some negative rhetoric from both sides as tensions seem to be heating up. In the meantime, external headwinds will continue to be prevalent with global trade noticeably slower post the earlier pre-emptive inventory build ahead of the Trump tariff implementation. Major currencies have been reacting to this uncertainty in the US and on global growth, with ongoing rhetoric of "end of US exceptionalism" and de-dollarisation being bandied about, which could explain the weakness in the US Dollar versus most currencies. Domestically, Malaysia's economy continues to be supported by the FDI being realized, domestic direct investments, strong construction activities, solid consumption growth and robust tourism activities. The domestic equity market remains flush with liquidity and dividend yield is attractive. Corporate earnings going forward have increased downside risks, which should not be a surprise given the slower GDP growth expectations for Malaysia for 2025. Economists have been revised down 2025 GDP estimates to 4%, versus BNM's official growth forecast of 4.5-5.5%. Nevertheless, we see any market weakness as opportunities to accumulate fundamentally strong stocks at attractive valuations.

Fund Review & Strategy

The Fund returned 1.68% for the month, outperforming the benchmark return of 1.01% by 0.67%. Year-to-date, the Fund returned -6.40%, outperforming the benchmark return of -8.66% by 2.26%. The outperformance in May was mainly due to stock selection of underlying local fund. Global equities gained in May, spurred by the 90-day pause in the tariffs imposed by the US and China. The Fund has preference onto global equities on better-than-expected corporate earnings in the US, especially from technology giants buoyed by artificial intelligence ("AI")-driven demand. Additionally, the US Manufacturing Purchasing Managers' Index ("PMI") increased to 52.0 in May, the highest in three months, pointing to strong growth of new orders.

Tinjauan Bulanan

Ekuiti Malaysia tidak mengatasi pencapaian pasaran serantau pada Mei, meskipun ketegangan perang perdagangan Tarif AS mengendur sedikit. Pelaporan keputusan korporat Malaysia pada bulan Mei agak hambar apabila lebih banyak syarikat menyampaikan sama ada prestasi yang lesu atau sejajar, dan hanya sebahagian kecil sahaja mampu memberi kejutan dari segi peningkatan. Sektor yang mengecewakan ialah sektor telekomunikasi, minyak dan gas, automotif, perjudian, penjagaan kesihatan dan utiliti. Sebaik musim pelaporan keputusan berlalu, konsensus telah menurunkan pendapatan daripada melebihi 6% kepada di bawah 3% bagi tahun 2025. Pada bulan tinjauan, BNM mengekalkan OPR pada 3% tetapi mengurangkan Keperluan Rizab Berkanun ("SRR") daripada 2% kepada 1% lalu melepaskan kecairan RM19bil ke dalam sistem perbankan. BNM menyatakan dengan terang bahawa perubahan kepada SRR adalah instrumen untuk mengurus kecairan dan bukanlah isyarat tentang pendirian dasar monetari. Indeks Syariahs EMAS FBM menutup bulan dagangan pada 11,256.26, turun 0.16% bulan ke bulan ("MoM"). Indeks Syariahs Bermodal Kecil FBM meningkat 1.21% pada bulan tersebut, mengatasi prestasi Indeks Syariahs EMAS FBM.

Gambaran Bulanan

Rundingan perdagangan antara AS dan banyak negara lain sedang berjalan, tetapi satu-satunya pasaran global yang dipantau dengan teliti ialah antara China dan AS, yang sejak kebelakangan ini diliputi retorik negatif daripada kedua-dua pihak memandangkan ketegangan kelihatan semakin memuncak. Sementara itu, tekanan luaran akan terus berleluasa dengan perdagangan global yang ketara lebih perlahan selepas penumpukan inventori yang lebih awal sebelum pelaksanaan tarif oleh Trump. Mata wang utama telah bertindak balas kepada ketidakpastian ini di AS mahupun pertumbuhan global, dengan retorik berterusan mengenai "berakhirnya eksepsionalisme AS" dan desas-desus dedolarisasi yang menjelaskan kelemahan Dolar AS berbanding kebanyakan mata wang. Di dalam negeri, ekonomi Malaysia terus disokong oleh aliran FDI, pelaburan langsung domestik, kerancangan aktiviti pembinaan, kemandapan pertumbuhan penggunaan dan keteguhan aktiviti pelancongan. Kecairan masih mengucur dalam pasaran ekuiti domestik manakala hasil dividen menarik. Pendapatan korporat pada masa hadapan telah menaikkan risiko penurunan, yang sepatutnya tidak mengejutkan, memandangkan jangkaan pertumbuhan KDNK Malaysia yang lebih perlahan bagi tahun 2025. Pakar ekonomi telah menyemak turun anggaran KDNK 2025 kepada 4%, berbanding ramalan pertumbuhan rasmi BNM sebanyak 4.5-5.5%. Namun begitu, kami melihat apa-apa kelemahan pasaran sebagai peluang untuk mengumpul saham berasas kukuh pada penilaian yang menarik.

Tinjauan & Strategi Dana

Dana mencatat pulangan 1.68% pada bulan ini, mengatasi pulangan penanda aras 1.01% dengan perbezaan 0.67%. Sejak awal tahun sehingga kini, Dana memperoleh pulangan -6.40%, mengatasi pulangan penanda aras sebanyak -8.66% dengan perbezaan 2.26%. Prestasi cemerlang pada bulan Mei disebabkan terutamanya oleh pemilihan saham pendasar dana tempatan. Ekuiti global meningkat pada Mei, didorong oleh penangguhan tarif yang dikenakan oleh AS dan China selama 90 hari. Dana mempunyai keutamaan terhadap ekuiti global berkait pendapatan korporat yang lebih baik daripada jangkaan di AS, terutamanya daripada gergasi teknologi yang disokong oleh permintaan yang didorong oleh kecerdasan buatan ("AI"). Selain itu, Indeks Pengurus Pembelian ("PMI") Pembuatan AS meningkat kepada 52.0 pada bulan Mei, angka tertinggi yang dicapai dalam tiga bulan, suatu bukti kukuhnya pertumbuhan pesanan baharu.
