Monthly Update / *Laporan Bulanan Terkini*

Market Review

November was a weak month for Malaysian equities weighed down by some disappointing 3Q25 results reported from selected big cap stocks including Petronas Chemicals, CelcomDigi and QL Resources. Malaysia reported a stronger 3Q25 GDP growth of 5.2% and by the end of November the Malaysian Ringgit was stronger at RM4.13/USD (+1.4% mom). The political noise from the Sabah State elections on November 29, 2025 may have led to weaker sentiment. Malaysia registered a net foreign outflow of RM1.1 billion in November, and a cumulative net outflow of RM20.3 billion for the YTD. The FBM Emas Shariah Index closed the month at 11,850.9, down 2.04% mom. The FBM Small Cap Shariah index was down 6.2% for the month and underperformed the FBM Emas Shariah Index.

Market Outlook

After reporting the 3Q25 results in November, consensus seems to have downgraded earnings growth for the FBMKLCI to around 4-5% due to analysts revising down their earnings forecasts for Petronas Chemicals and Tenaga. Petronas Chemicals' 3Q25 weak earnings were mainly due to lower product spreads and continued losses from Pengerang Petrochemical Complex (PPC), which remains underutilized. Tenaga's 9MFY25 was below consensus expectations on higher depreciation charges and tax expenses. Tenaga has finally settled the tax overhang issue with the IRB and stated that they have been approved to claim ITA YA 2003-2024 under Schedule 7B, to be deducted from future taxable income (details to be finalised), and will continue to claim ITA for future capex spending (which is better than CA under Schedule 7A). Domestically, Malaysia is in a favourable position with relatively stable politics compared to some of our other ASEAN peers. However, the results of the Sabah State elections will likely mean that the GE16 will be held in 2027, with some speculating that it may be held together with the Johor State Elections. The economy continues to be supported by the realization of FDI and domestic direct investments, strong construction activities, solid consumption growth, and robust tourism activities. The domestic equity market remains flush with liquidity and dividend yield is attractive. We see any market weakness as an opportunity to accumulate fundamentally strong stocks at attractive valuations.

Fund Review & Strategy

The Fund returned -1.23% for the month, outperforming the benchmark return of -1.99% by 0.76%. Year-to-date, the Fund returned 1.78%, outperforming the benchmark return of -0.94% by 2.72%. The outperformance in November was mainly attributed to local equity exposure on securities selection within technology sector, as well as underweight position in utilities sector. Near-term, accommodative monetary and fiscal stimulus is expected to boost liquidity and growth, countering any drags on growth stemming from US trade policies. Against this backdrop, we expect risk assets (i.e. equities) to continue to outperform. Nevertheless, relatively rich valuation for global equities (particularly US) is expected to be a potential headwind. As such, the team has turned overweight Malaysia relative to global equities on relative valuation and fundamental considerations.

Tinjauan Bulanan

Ekuiti Malaysia dilanda kelemahan pada bulan November, terjejas akibat sesetengah laporan prestasi suku ketiga 2025 daripada saham permodalan besar yang mengecewakan termasuk Petronas Chemicals, CelcomDigi dan QL Resources. Malaysia melaporkan pertumbuhan KDNK 3Q25 2025 yang lebih kukuh iaitu 5.2% dan menjelang akhir November, Ringgit Malaysia mengukuh kepada RM4.13/USD (+1.4% bulan ke bulan, MoM). Gegaran politik daripada pilihan raya Negeri Sabah yang diadakan pada 29 Nov 2025 mungkin telah melemahkan sentimen. Malaysia terus mencattakan jualan asing bersih sebanyak RM1.1 bilion pada November, manakala aliran keluar bersih kumulatif YTD berjumlah RM20.3 bilion sejak awal tahun sehingga kini. Indeks FBM Emas Shariah menutup bulan tinjauan pada 11,850.9, turun 2.04% bulan ke bulan (MoM). Indeks FBM Small Cap Shariah susut 6.2% pada bulan ini sambil mengatasi FBM Emas Shariah.

Gambaran Bulanan

Selepas melaporkan keputusan 3Q25 pada bulan November, konsensus nampaknya telah menurunkan pertumbuhan pendapatan FBMKLCI kepada sekitar 4-5%, disebabkan oleh penganalisis yang merombak semula ramalan pendapatan ke atas Petronas Chemicals dan Tenaga. Kelemahan pendapatan Petronas Chemicals pada 3Q25 disebabkan terutamanya oleh taburan produk yang lebih rendah dan kerugian berterusan daripada Kompleks Petrokimia Pengerang (PPC), yang tidak dioptimumkan penggunaanya. 9MFY25 Tenaga tidak menepati jangkaan konsensus tentang caj susut nilai yang lebih tinggi dan perbelanjaan cukai. Akhirnya, Tenaga menyelesaikan isu cukai yang tidak terjual dengan LHDN dan menyatakan bahawa mereka telah dibenarkan untuk menuntut ITA YA 2003-2024 di bawah Jadual 7B, yang akan ditolak daripada pendapatan boleh cukai masa hadapan (butiran akan dimuktamadkan), dan akan terus menuntut ITA ke atas perbelanjaan capex masa hadapan (yang lebih baik daripada CA di bawah Jadual 7A). Di dalam negeri, Malaysia berada dalam kedudukan yang baik dengan kestabilan politik berbanding dengan sebilangan rakan seangkatan ASEAN yang lain. Namun begitu, keputusan pilihan raya Negeri Sabah mungkin bermaksud bahawa PRU16 akan diadakan pada tahun 2027, dengan sesetengah pihak membuat spekulasi bahawa ia mungkin diadakan seiring dengan Pilihan Raya Negeri Johor. Ekonomi terus disokong oleh FDI dan pelaburan langsung domestik, kerancakan aktiviti pembinaan, kekuatan pertumbuhan penggunaan, dan keteguhan aktiviti pelancongan. Kecairan pasaran ekuiti domestik masih mengucur manakala hasil dividen menarik. Kami melihat bahawa apa-apa kelemahan pasaran sebagai peluang untuk mengumpul saham berasas kukuh pada penilaian yang menarik.

Tinjauan dan Strategi Dana

Dana menghasilkan pulangan -1.23% pada bulan ini, mengatasi pulangan penanda aras -1.99% dengan perbezaan 0.76%. Sejak awal tahun sehingga kini, Dana menyajikan pulangan 1.78%, mengatasi pulangan penanda aras -0.94% dengan perbezaan 2.72%. Prestasi cemerlang pada bulan November sebahagian besarnya disebabkan oleh pendedahan ekuiti tempatan terhadap pemilihan sekuriti dalam sektor teknologi, serta kedudukan kekurangan pegangan dalam sektor utiliti. Dasar monetari yang akomodatif dan rangsangan fiskal dijangka akan menambahkan kecairan dan menaikkan pertumbuhan tidak lama lagi, lalu mengatasi sebarang halangan terhadap pertumbuhan yang berpunca daripada dasar perdagangan AS. Oleh itu, kami menjangkakan aset berisiko (iaitu ekuiti) akan terus menunjukkan prestasi cemerlang. Walau bagaimanapun, penilaian ekuiti global (terutamanya AS) yang agak tinggi dijangka menggugat potensi. Justeru, pasukan pelaburan memegang Malaysia secara berlebihan berbanding ekuiti global berdasarkan penilaian relatif dan pertimbangan asas.
