Monthly Update / Laporan Bulanan Terkini

Market Review

Malaysian equity market declined for the third consecutive month, as foreign investors continued to be net sellers of equity in November to the tune of RM 3 billion, turning the YTD flows to a net outflow of RM0.8 billion. The US Presidential Elections took center stage in the beginning of the month. President-elect Trump winning convincingly was a bit of a surprise as investors were expecting the race to be tighter. Nevertheless, emerging markets post this election result saw weakness as the threat of US imposing higher import tariffs have become more of a reality. The month of November was corporate results reporting for the 3Q24, and results were either inline or below expectations, with some underlying weakness seen in some consumer and technology stocks. The impact of the sharp MYR appreciation up to end September 2024 when it reached RM 4.1235/USD, also negatively affected many companies' earnings in unrealized forex losses, hitting exporters especially hard. The FBM EMAS Shariah Index closed the month at 12,034.69, down 0.23% MoM. However, the FBM Small Cap Shariah Index rose 2.8% for the month and outperformed the FBM EMAS Shariah Index.

Market Outlook

December generally has been a positive month for Malaysian equities, for the KLCI this has been the case in the last 9 years. The much-awaited Johor-Singapore Special Economic Zone was supposed to be finalized on 9 December 2024, with the meeting of the two countries' leaders, now will likely have to be postponed as the media have reported that the Singapore's Prime Minister has contracted Covid. Nevertheless, we remain constructive on Malaysia, as the domestic market continues to be supported by the improving economy, strong FDI, corporate earnings growth, flushed liquidity and tourism rebound. We will selectively rotate from stocks which have done well and deploy into laggards with potential catalysts, such as companies benefitting from the investment upcycle, US-China trade war and high dividend yielding stocks. In the short term, we may see stronger USD, and this will be positive to Malaysian exporters such as gloves, plantations, technology, and selective industrial companies. In the longer term, there could be more market volatility from a Trump presidency.

Fund Review & Strategy

The Fund rose 1.44% for the month, outperforming the benchmark return of -0.23% by 1.67%. Year-to-date, the Fund returned 16.02%, outperforming the benchmark return of 9.51% by 6.51%. The outperformance in November was mainly due to underlying Fund's overweight position in the healthcare sector and selected industrials stocks. The Fund remains constructive on sectors that stand to benefit from thematic plays (NETR, NIMP, JS-SEZ). We will also maintain our core holdings in high dividend yielding stocks to anchor the Fund.

Tinjauan Bulanan

Pasaran ekuiti Malaysia merosot untuk bulan ketiga berturut-turut, apabila pelabur asing terus menjadi penjual bersih ekuiti sehingga RM3 bilion pada bulan November, lalu menjadikan aliran keluar bersih YTD kepada RM0.8 bilion. Pilihan Raya Presiden AS menjadi tumpuan utama pada awal bulan ini. Sedikit mengejutkan apabila Presiden yang terpilih, Trump, menang dengan meyakinkan kerana pelabur menjangkakan pertandingan akan lebih sengit. Namun begitu, pasca pilihan raya ini, pasaran baru muncul dilanda kelemahan berikutan ancaman AS mengenakan tarif import yang lebih tinggi semakin menjadi nyata. Keputusan korporat bagi 3Q24 dilaporkan pada bulan November, dan keputusannya sama ada selaras atau di bawah jangkaan, dengan beberapa kelemahan tersirat dilihat melalui sebahagian saham pengguna dan teknologi. Kenaikan mendadak MYR sehingga akhir September 2024 apabila ia mencencang RM4.1235/USD, turut memberi kesan negatif ke atas pendapatan banyak syarikat berikutan kerugian tukaran mata wang asing yang tidak direalisasi, terutama sekali pengeksport. Indeks Syariah EMAS FBM menutup bulan pada 12,034.69, turun 0.23% bulan ke bulan (MoM). Namun begitu, Indeks Syariah Bermodal Kecil FBM meningkat 2.8% pada bulan November dan mengatasi prestasi Indeks Syariah EMAS FBM.

Gambaran Bulanan

Disember secara amnya merupakan bulan yang positif buat ekuiti Malaysia, ini telah berlaku buat KLCI dalam tempoh 9 tahun yang lalu. Zon Ekonomi Khas Johor-Singapura yang dinanti-nantikan sepatutnya dimuktamadkan pada 9 Disember 2024, dengan pertemuan pemimpin kedua-dua negara, kini mungkin perlu ditangguhkan kerana media melaporkan bahawa Perdana Menteri Singapura telah dijangkiti Covid. Namun begitu, kami kekal berpandangan konstruktif ke atas Malaysia, memandangkan pasaran domestik terus disokong oleh ekonomi yang bertambah baik, FDI yang kukuh, pertumbuhan pendapatan korporat, limpahan kecairan dan pemulihan pelancongan. Kami secara selektif akan bergilir daripada saham-saham yang telah menunjukkan prestasi cemerlang kepada saham-saham yang ketinggalan namun mempunyai potensi pemangkin, seperti syarikat yang mendapat manfaat daripada kitar tinggi pelaburan, perang perdagangan AS-China dan saham yang menghasilkan dividen tinggi. Dalam jangka pendek, kita mungkin melihat USD yang lebih kukuh, dan ianya akan memberi kesan positif kepada pengeksport Malaysia seperti sarung tangan, perlادangan, teknologi dan syarikat perindustrian tertentu. Menyorot jangka panjang, turun naik pasaran mungkin akan lebih banyak susulan Trump memenangi jawatan presiden.

Tinjauan & Strategi Dana

Dana naik 1.44% pada bulan ini, mengatasi pulangan penanda aras sebanyak -0.23% dengan perbezaan 1.67%. Sejak awal tahun sehingga bulan tinjauan, Dana memulangkan 16.02%, mengatasi pulangan penanda aras sebanyak 9.51% dengan perbezaan 6.51%. Prestasi baik pada bulan November disebabkan terutamanya oleh kedudukan pegangan berlebihan Dana Sasaran dalam sektor penjagaan kesihatan dan saham perindustrian terpilih. Dana masih konstruktif ke atas sektor yang mendapat manfaat daripada permainan bertema (NETR, NIMP, JS-SEZ). Kami juga akan mengekalkan pegangan teras dalam saham yang menghasilkan dividen tinggi untuk menambat Dana.
