## Monthly Update / Laporan Bulanan Terkini

### Market Review

Malaysian equity markets saw positive performance relatively in line with regional markets in July, driven partly by the much stronger Malaysian Ringgit. Foreign investors were net buyers of Malaysian equities to the tune of RM1.4b in July, resulting in YTD net foreign fund flow of RM0.9b. Malaysia's advanced estimate for GDP in 2Q2024 came in at 5.8%, higher than expected, driven by faster growth in most sectors except mining. The construction sector saw continued double-digit growth (+17.2% advanced estimate) driven by firmer growth across all subsectors. The actual GDP data for 2Q2024 will be announced on August 16, 2024. The FBM Emas Shariah Index closed the month at 12,762.46, up 1.67% mom. The FBM Small Cap Shariah Index declined 0.10% for the month and underperformed the FBM Emas Shariah Index.

### Market Outlook

Global markets were in a tailspin at the start of August, on the back of a slew of negative news flow. Concerns over a potential US hard landing as Friday's jobs report led to market speculation that the US Federal Reserve may even consider a 50bps cut in FFR versus 25bps. In addition, the high number of negative earnings guidance during the US 2Q24 results season adds to the concerns. The Bank of Japan's surprise move to raise interest rates, saw investors reassessing their carry trades. On top of the financial turmoil, geopolitical tensions ratcheted up a notch, with Iran vowing revenge for the alleged assassination of Hamas political leader in Tehran. The death of the Hamas leader further heightened tensions at an already volatile time, raising fears that Israel's conflict with Hamas and its allies could develop into a multi-front, fully-fledged war in the Middle East. Israel has neither confirmed nor denied their involvement. The rise in geopolitical tensions globally, in addition to the financial turmoil from the US and Japan, and the unwinding of Yen carry trades, has resulted in investors rushing to lock in profits. For Malaysia, which was one of the best performing markets regionally, would see investors keen to take money off the table. The weaker USD could be negative for exporters in general or those that report earnings in USD such as in oil and gas. On the other hand, producers with raw materials denominated in USD may benefit as it would reduce their input cost. Some auto players may be affected negatively with the stronger Yen, impacting their input cost. However, this risk off is mostly externally driven. Domestically, the Malaysian economy has been on a firm path of progress, with data points improving, investments coming in, tourism numbers higher, and consumer spending resilient. After waiting for the knee-jerk reaction to settle down, we would look to accumulate fundamentally sound stocks, with upside potential, but were expensive earlier.

### Fund Review & Strategy

The Fund returned 2.01% for the month, outperforming the benchmark return of 1.00% by 1.01%. Year-to-date, the Fund returned 15.66%, outperforming the benchmark return of 13.97% by 1.69%. The outperformance in July was mainly due to security selection within local equity fund which contributed positively. Developed Markets (DM) outperformed Emerging Markets (EM) due to falling markets in Taiwan, China, and South Korea. Global equity markets have sold off on US recession fears. Our base case is still a soft-landing scenario as the Fed has significant room to cut rates to cushion a deeper than expected slowdown. Domestically, earnings recovery, stable politics, increasing FDI as well as potential US Federal Reserve rate cut should support continued gains for Malaysian equities. In the near term, the Fund is expected to hold close to neutral position.

### Tinjauan Bulanan

Pasaran ekuiti Malaysia merakamkan prestasi positif secara relatif, sejajar dengan pasaran serantau pada Julai, sebahagiannya didorong oleh Ringgit Malaysia yang lebih kukuh. Pelabur asing adalah pembeli bersih ekuiti Malaysia berjumlah RM1.4 bilion pada Julai, lalu menghasilkan aliran dana asing bersih RM0.9 bilion YTD. Anggaran awal KDNK Malaysia pada 2Q2024 mencapai 5.8%, lebih tinggi daripada jangkaan, didorong oleh pertumbuhan kebanyakan sektor lebih pantas kecuali perlombongan. Sektor pembinaan menyaksikan pertumbuhan dua angka secara berterusan (+17.2% anggaran awal) didorong oleh pertumbuhan yang lebih kukuh merentas semua subsektor. Data KDNK sebenar 2Q2024 akan diumumkan pada 16 Ogos 2024. Indeks FBM Emas Shariah menutup bulan dagangan pada 12,762.46, naik 1.67% MoM. Indeks FBM Small Cap Shariah merosot 0.10% pada bulan ini dan tidak mengatasi prestasi Indeks FBM Emas Shariah.

### Gambaran Bulanan

Pasaran global mengalami kemerosotan pada awal bulan Ogos, berikutan aliran berita negatif yang banyak. Kebimbangan tentang potensi pendaratan keras AS ekoran laporan pekerjaan pada hari Jumaat membawa kepada spekulasi pasaran bahawa Rizab Persekutuan AS mungkin mempertimbangkan pemotongan FFR sebanyak 50 mata asas berbanding 25 mata asas. Di samping itu, bilangan panduan pendapatan negatif yang tinggi semasa musim keputusan 2Q24 AS semakin menambah kebimbangan. Langkah mengejut Bank of Japan menaikkan kadar faedah, menyaksikan pelabur menilai semula dagangan bawaan mereka. Di samping kegawatan kewangan, ketegangan geopolitik semakin memuncak, dengan Iran berikrar membalas dendam ke atas dakwaan pembunuhan pemimpin politik Hamas di Tehran. Kematian pemimpin Hamas itu semakin menegangkan konflik pada masa yang sudah pun tidak menentu, lalu menambah kekusaran bahawa konflik Israel dengan Hamas dan sekutunya boleh berkembang menjadi perang pelbagai pihak di Timur Tengah. Israel tidak pula mengesahkan mahupun menafikan penglibatan mereka. Peningkatan ketegangan geopolitik di seluruh dunia, di samping kegawatan kewangan di AS dan Jepun, di samping pelonggaran perdagangan bawaan Yen, telah menyebabkan pelabur tergesa-gesa untuk menawan keuntungan. Bagi Malaysia, yang merupakan salah satu pasaran berprestasi terbaik di peringkat serantau, akan menyaksikan pelabur berminat untuk mengeluarkan wang dari negara tersebut. USD yang lebih lemah boleh menjadi negatif buat pengeksport secara umum atau pihak yang melaporkan pendapatan dalam USD seperti minyak dan gas. Sebaliknya, pengeluar dengan bahan mentah dalam denominasi USD mungkin mendapat manfaat kerana ia akan mengurangkan kos input mereka. Sesetengah pelabur automotif mungkin terjejas secara negatif berikutan Yen yang lebih kukuh, lalu memberi kesan kepada kos input mereka. Namun begitu, risiko ini kebanyakannya didorong oleh faktor luaran. Di dalam negeri, ekonomi Malaysia berada di landasan kemajuan yang kukuh, dengan titik data bertambah baik, pelaburan masuk, angka pelancongan lebih tinggi, dan perbelanjaan pengguna yang mampan. Selepas menunggu reaksi mengejut menjadi reda, kami akan meninjau untuk mengumpul saham berasas yang kukuh, dengan potensi untuk meningkat tetapi berharga mahal sebelum ini.

### Tinjauan & Strategi Dana

Dana menghasilkan pulangan 2.01% pada bulan ini, mengatasi pulangan penanda aras 1.00% dengan perbezaan 1.01%. Sejak awal tahun sehingga bulan tinjauan, Dana meraih pulangan 15.66%, mengatasi pulangan penanda aras 13.97% dengan perbezaan 1.69%. Prestasi memberangsangkan pada Julai disebabkan terutamanya oleh pemilihan sekuriti dalam dana ekuiti tempatan yang menyumbang secara positif. Pasaran Maju mengatasi prestasi Pasaran Baru Muncul disebabkan kejatuhan pasaran di Taiwan, China dan Korea Selatan. Pasaran ekuiti global telah dijual lantaran bimbang tentang kemelesetan AS. Kes asas kami masih merupakan senario pendaratan lembut kerana Fed mempunyai ruang yang besar untuk mengurangkan kadar faedah demi menampung kelembapan yang lebih dalam daripada jangkaan. Di dalam negeri, pemulihan pendapatan, politik yang stabil, peningkatan FDI serta potensi pematangan kadar faedah Rizab Persekutuan AS seharusnya menyokong keuntungan ekuiti Malaysia yang berterusan. Dalam tempoh terdekat, Dana dijangka memegang kedudukan hampir kepada neutral.
