Monthly Update / Laporan Bulanan Terkini

Market Review

Malaysian equity markets saw some consolidation in June 2024 which could be related to profit taking activities, following the strong performance of 1H24, where Malaysia outperformed most markets. During the month, the retail price of diesel at the pump was raised to RM 3.35/litre from RM2.15/litre effective 10 June 2024 across Peninsular Malaysia. June also saw a flurry of news regarding Data Centres with the sale of land by Eco World and UEM Sunrise, and Telekom announced their partnership Singtel's Data Centre unit Nxera to develop data centres. China's Premier Li Qiang was in Malaysia for a three-day maiden visit mid-June and witnessed the signing of 14 memoranda of understanding and agreements involving nine Malaysian ministries. The FBM EMAS Shariah Index closed the month at 12,552.70, up 1.29% mom. The FBM Small Cap Shariah index gained 3.64% for the month, outperforming the broader based FBM Emas Shariah Index.

Market Outlook

The Malaysian equity markets have been performing well in 1H24. Recent buying support could be the result of funds flowing back to Malaysia with the intention to invest domestically, post the government and BNM's encouragement of GLICs and GLCs to repatriate dividends to Malaysia. The Employees Provident Fund (EPF) has approved nearly RM7 billion in withdrawals from Account Flexible (also called Account 3) as of June 10, according to the Ministry of Finance (MOF). The availability of these funds could lead to a boost in consumption. However, this could be mitigated by the expected rationalization of petrol subsidies expected to be rolled out in 2H2024. The shape and form of this measure has yet to be announced. Overall, we are cautious on the potential inflationary impact of the subsidy removals, and the possible second round price hikes. The Malaysian's commitment to the boycott of goods and services from companies deemed to be in support of Israel has been strong, leading to F&B outlet closures, which may have a longer-term negative impact for investment in Malaysia and on employment opportunities for Malaysians. Nevertheless, equity markets may still be buoyant due to the ample liquidity. Investor interest in Malaysia has remained high because of news about data center investments. Any correction in the market will provide us with the opportunity to accumulate fundamentally sound stocks.

Fund Review & Strategy

The Fund returned 2.28% for the month, outperforming the benchmark return of 1.31% by 0.97%. Year-to-date, the fund returned 13.38%, outperforming the benchmark return of 12.84% by 0.54%. The outperformance in June was mainly due to security selection within equity fund which contributed positively. Global equity markets rose in June, buoyed by robust corporate earnings, advancements in AI & Technology, and strengthening fundamentals. Despite US valuations continued to be in the "rich" territory, some short-term upside potential remains if constructive fundamental data indicators continue to persist (e.g., still resilient labor market, manufacturing sector stabilizing). Meanwhile, domestically, a confluence of domestic (earnings recovery, progressive business policies, stable politics, increasing FDI) and external factors (semiconductor cycle upswing, rate cut expectation) should support continued gains for Malaysian equities. In the near term, the Fund is expected to hold close to neutral position.

Tinjauan Bulanan

Pasaran ekuiti Malaysia merakamkan beberapa penyatuan pada Jun 2024 yang boleh dikaitkan dengan aktiviti pengambilan untung, berikutan prestasi kukuh 1H24 setakat ini, yang mana Malaysia mengatasi pencapaian kebanyakan pasaran. Pada bulan ini, harga runcit diesel di pam dinaikkan kepada RM3.35/ liter daripada RM2.15/ liter berkuat kuasa 10 Jun 2024 di seluruh Semenanjung Malaysia. Jun juga merekodkan berita mengenai Pusat Data dengan penjualan tanah oleh Eco World dan UEM Sunrise, manakala Telekom mengumumkan perkongsian unit Pusat Data Singtel Nxera untuk membangunkan pusat data. Perdana Menteri China Li Qiang berada di Malaysia atas tiket lawatan sulung tiga hari di pertengahan Jun, dan menjadi saksi majlis menandatangani 14 memorandum persefahaman dan perjanjian melibatkan sembilan kementerian Malaysia. Indeks FBM EMAS Shariah menutup bulan dagangan pada 12,552.70, naik 1.29% MoM. Indeks FBM Small Cap Shariah memperoleh 3.64% pada bulan tersebut, mengatasi prestasi Indeks FBM Emas Shariah.

Gambaran Bulanan

Pasaran ekuiti Malaysia mempamerkan prestasi yang baik pada 1H24. Sokongan pembelian baru-baru ini mungkin hasil daripada dana yang mengalir kembali ke Malaysia dengan tujuan untuk dilaburkan di dalam negara, selepas galakan kerajaan dan BNM terhadap GLIC dan GLC untuk menghantar pulang dividen ke Malaysia. Kumpulan Wang Simpanan Pekerja (KWSP) telah meluluskan hampir RM7 bilion pengeluaran daripada Akaun Fleksibel (juga dipanggil Akaun 3) setakat 10 Jun menurut Kementerian Kewangan (MOF). Ketersediaan dana ini boleh mendorong meningkatnya penggunaan. Namun begitu, ia boleh ditampakan dengan jangkaan rasionalisasi subsidi petrol yang dijangka akan dilaksanakan pada 2H2024. Bentuk dan rupa langkah ini masih belum diumumkan. Secara keseluruhan, kami berhati-hati terhadap potensi kesan inflasi akibat pemansuhan subsidi, dan kemungkinan kenaikan harga pusingan kedua. Komitmen rakyat Malaysia terhadap pemboikotan barangan dan perkhidmatan syarikat yang dianggap menyokong Israel tetap utuh, lalu menyebabkan penutupan rangkaian kedai F&B, yang mungkin memberi kesan negatif jangka panjang ke atas pelaburan di Malaysia dan peluang pekerjaan buat rakyat Malaysia. Sungguhpun demikian, pasaran ekuiti mungkin terus rancak disebabkan kecairan yang lebih dari mencukupi. Minat pelabur ke atas Malaysia kekal tinggi berikutan berita mengenai pelaburan pusat data. Apa-apa pembedahan dalam pasaran akan memberi kami peluang untuk mengumpul saham yang berprestasi kukuh.

Tinjauan & Strategi Dana

Dana menghasilkan pulangan 2.28% pada bulan ini, mengatasi pulangan penanda aras 1.31% dengan perbezaan 0.97%. Sejak awal tahun sehingga bulan tinjauan, Dana meraih pulangan 13.38%, mengatasi pulangan penanda aras 12.84% dengan perbezaan 0.54%. Prestasi membanggakan pada Jun disebabkan terutamanya oleh pemilihan sekuriti dalam dana ekuiti yang menyumbang secara positif. Pasaran ekuiti global melonjak pada Jun, disokong oleh pendapatan korporat yang teguh, kemajuan AI & Teknologi, dan pengukuhan asas. Walaupun penilaian US terus berada dalam wilayah yang "kaya", sebahagian potensi peningkatan jangka pendek kekal jika ketegaran penunjuk data asas yang konstruktif berterusan (contohnya pasaran buruh yang masih berdaya tahan, penstabilan sektor pembuatan). Sementara itu di dalam negeri, gabungan faktor domestik (pemulihan pendapatan, dasar perniagaan progresif, politik yang stabil, FDI yang meningkat) dan faktor luaran (peningkatan kitaran semikonduktor, jangkaan pemotongan kadar faedah) seharusnya menyokong laba ekuiti Malaysia yang berterusan. Dalam tempoh terdekat, Dana dijangka memegang kedudukan hampir kepada neutral.
