Monthly Update / Laporan Bulanan Terkini

Market Review

Malaysian equity markets continued its decline for the fifth consecutive month in May 2023, in tandem with regional markets which were also lackluster. The focus for the month of May was around corporate earnings, with most reporting earnings below consensus expectations. News flow was light during the month, with some focus on interest rates in Malaysia as BNM raised OPR by 25bps. Malaysian Ringgit also saw a lot of pressure versus the US dollar, weakening to above RM4.60/USD. The FBM Emas Shariah Index closed the month at 10,606.51 down 1.21% mom. The FBM Small Cap Shariah index declined 4.35% for the month and underperformed the FBM Emas Shariah Index.

Market Outlook

Global political issues continue to fester, without any resolution of the Russia-Ukraine conflict, and US-Sino relations remain tense. Whilst the global banking crisis seems to have so far been averted, it is still early days and this still something investors will remain vigilant about. Domestically, equity markets have been listless, with many investors staying on the sidelines waiting for the announcement of state elections for Penang, Selangor, Negri Sembilan, Kedah, Terengganu and Kelantan. Our base case is still for the status quo to remain in those states, and hence the Federal Unity government can continue their administration. Uncertainty stemming from this remains an overhang on the market. During this period of uncertainty, we would accumulate fundamentally sound stocks on weakness.

Fund Review & Strategy

The Fund returned -0.48% for the month, outperforming the benchmark return of -0.64% by 0.16%. Year-to-date, the fund returned 0.87%, outperforming the benchmark return of 0.17% by 0.70%. The outperformance in May was due to allocation and currency effect. Global equities declined in May, as mixed PMI data and elevated core inflation figures, as well as the US debt ceiling impasse, weighed on investors sentiment. We have preference on global equities over Malaysian equities. Domestically, overhang on political and policy uncertainties, softer commodity prices, weak currency and further earnings downgrade risk likely to keep investors sidelined despite attractive valuation.

Tinjauan Bulanan

Pasaran ekuiti Malaysia meneruskan penurunan bagi bulan yang kelima berturut-turut pada Mei 2023, sejajar dengan pasaran serantau yang juga hambar. Tumpuan diarahkan kepada pendapatan korporat, dengan kebanyakan pelaporan pendapatan di bawah jangkaan konsensus. Aliran berita adalah ringan dengan sedikit minat terhadap kadar faedah apabila BNM menaikkan Kadar Dasar Semalam (OPR) sebanyak 25 mata asas kepada 3.0%. Ringgit Malaysia juga mengalami tekanan daripada USD, menyusut kepada melebihi RM4.60/ USD. Indeks FBM Emas Shariah menutup bulan dagangan pada 10,606.51 turun 1.21% MoM. Indeks FBM Small Cap Shariah merosot 4.35% pada bulan tersebut dan tidak mengatasi prestasi Indeks FBM Emas Shariah.

Gambaran Bulanan

Isu politik global terus meruncing, tanpa sebarang penyelesaian konflik Rusia-Ukraine, manakala hubungan US-China masih tegang. Walaupun krisis perbankan global nampaknya dapat dielakkan setakat ini, namun ianya masih awal dan ini merupakan suatu hal yang pelabur akan tetap berwaspada dengannya. Di dalam negeri, pasaran ekuiti tidak bermaya, dengan ramai pelabur berada di luar gelanggang, menunggu pengumuman 6 pilihan raya negeri. Kes asas kami ialah status quo di negeri-negeri tersebut, dan oleh itu kerajaan Perpaduan Persekutuan boleh meneruskan pentadbirannya. Ketidakpastian yang berpunca daripada keadaan kekal terjuntai di pasaran. Dalam tempoh ketidakpastian ini, kami akan mengumpul saham berbasisku pada harga yang lebih rendah.

Tinjauan dan Strategi Dana

Dana memberikan pulangan -0.48% pada bulan ini, mengatasi pulangan penanda aras -0.64% sebanyak 0.16%. Sejak awal tahun sehingga kini, Dana mengembalikan 0.87%, mengatasi pulangan penanda aras 0.17% sebanyak 0.70%. Prestasi baik pada Mei disebabkan oleh peruntukan dan kesan mata wang. Ekuiti global merosot pada Mei, apabila data PMI bercampur-campur dan angka inflasi teras yang tinggi, di samping kebuntuan siling hutang US menjelaskan sentimen pelabur. Kami mengutamakan ekuiti global berbanding ekuiti Malaysia. Di dalam negeri, jumlah ketidaktentuan politik dan dasar, harga komoditi yang lebih lembut, mata wang yang lemah dan risiko penurunan taraf pendapatan selanjutnya berkemungkinan menyebabkan pelabur mengenepi walaupun penilaian menarik.
